SPECIES LISTING FOR IMPORTATION

LISTED SPECIES REFERENCE GUIDE

ANIMAL HEALTH
ANIMAL CONTROL

Animal Health and Control

Compiled List of Acceptable and Banned Species for Entry into Guam – Updated June 2022

Mammals:

- Accepted
 - Dogs
 - Cats
 - Mice for research or for projects to control brown tree snake populations ONLY
 - Pet rabbits that have been spayed or neutered
- Banned
 - Mice and rodents for breeding or pet sale
 - Rabbit species for game, breeding, or sale
 - Unaltered/intact pet rabbits
 - Guinea pigs
 - Chinchilla
 - Ferrets
 - Hedgehogs
 - Sugar gliders
 - Other Canidae species including hybrids

Birds:

- Accepted
 - Poultry from the United States
 - Lady Gouldian finches
 - Zebra finches
 - European society finches
 - Red rumped parrots (parakeets)
 - Lovebirds
 - Diamond doves
 - Green cheeked conures
 - Caique
 - Cockatiels
 - Macaws
 - Blue and gold macaw
 - Scarlet macaw
 - Hyacinth macaw
 - Green winged macaw
 - African Grey parrot
 - Sun Conure
 - Common parakeet/budgerigar
 - Ostriches allowable on agriculture land with appropriate housing and care plan (site approval by Territory Vet and DAWR required)
 - Peking ducks (in theory but only allowable from the US and Hawaii won't allow transit)
 - Domestic turkeys (on agricultural land only)

Animal Health and Control

- Banned
 - Poultry from any other region other than the United States
 - Pigeons
 - Rock doves
 - Homing pigeons
 - King pigeons
 - Monk/quaker parakeets
 - Indian ring neck parakeet (aka rose-ringed parakeet)
 - All species of quails
 - All species of pheasants
 - Including ring-neck pheasants
 - Java finches
 - Eclectus parrots
 - Lace neck dove
 - Cockatoos
 - Alexadrine parrot
 - Violet Indian ringneck
 - Yellow-fronted canary
 - Green singing finch
 - Ring necked doves
 - Guinea fowl
 - Quail
 - Peacocks

Reptiles & Amphibians – none allowed

Fish and Aquatic species are issued or denied permits directly through DAWR

Insects and Invertebrate species are issued or denied permits directly through Biosecurity

*DAWR Aquatic Species
pre-approved listing
(species not found are subject for review by
Biologist)*

6-3-2020 FRESHWATER FISHES

NO.	SPECIES
1	Aborichthys spp.
2	Abramites spp. (all)
3	Acanthocobitis botia
4	Acanthopthalmus kuhlii
5	Acanthopsis choirorhynchus
6	Acarichthys spp. (all)
7	Achirus errans
8	Aequidens spp. (all)
9	Agamyxis pectifrons
10	Altolamprologus spp. (all)
11	Amphilophus citrinellum
12	Andinoacara pulcher
13	Anostomus spp. (all)
14	Aphyocharax spp. (all)
15	Aphyosemion spp. (all)
16	Apistogramma spp. (all)
17	Aplocheilichthys spp. (all)
18	Aplocheilus spp. (all)
19	Aplocheilus spp. (all)
20	Apteronotus albifrons
21	Apteronotus leptorhynchus
22	Archocentrus centrarchus
23	Archocentrus nigrofasciatus
24	Archocentrus sajica
25	Arenigobius bifrenatus
26	Aristichthys nobilis
27	Aristochromis christyi
28	Arnoldichthys spilopterus
29	Asterophysus batrachus
30	Astronotus ocellatus
31	Astyanax mexicanus
32	Aulanocara spp. (all)
33	Auriglobius nefastus
34	Awaous grammepomus
35	Badis badis
36	Bagre bagre
37	Balantiocheilus melanopterus
38	Barbodes spp. (all)
39	Barbonymus altus
40	Barbus spp. (all)
41	Batasio batasio
42	Batasio batasio

43	<i>Bathyaethiops caudomaculatus</i>
44	<i>Beaufortia levertii</i>
45	<i>Bedotia geayi</i>
46	<i>Betta</i> spp. (all)
47	<i>Boehlkea fredcochui</i>
48	<i>Boraras</i> spp. (all)
49	<i>Botia</i> spp. (all)
50	<i>Boulengerella maculata</i>
51	<i>Brachydanio</i> spp. (all)
52	<i>Brachygobius</i> spp. (all)
53	<i>Brycon</i> spp. (all)
54	<i>Bryconaethiops microstoma</i>
55	<i>Bucephalandra</i> spp. (all)
56	<i>Capoeta</i> spp. (all)
57	<i>Carinotetraodon travancoricus</i>
58	<i>Carnegiella</i> spp. (all)
59	<i>Carrasius auratus</i> - not from Asia
60	<i>Celestichthys margaritatus</i>
61	<i>Chaca chaca</i>
62	<i>Chalceus</i> spp. (all)
63	<i>Chalinochromis</i> spp. (all)
64	<i>Chanda</i> spp. (all)
65	<i>Chandamaranda chandamaranda</i>
66	<i>Cheirodon</i> spp. (all)
67	<i>Chela</i> spp. (all)
68	<i>Chelonodon patoca</i>
69	<i>Chilodus punctatus</i>
70	<i>Chitala</i> spp. (all)
71	<i>Chromobotia macracantha</i>
72	<i>Cichlasoma</i> spp. (all)
73	<i>Cleithracara maronii</i>
74	<i>Cobitis taenia</i>
75	<i>Coelurichthys microlepis</i>
76	<i>Coius</i> spp. (all)
77	<i>Colisa</i> spp. (all)
78	<i>Colomesus</i> spp. (all)
79	<i>Copadichromis</i> spp. (all)
80	<i>Copella</i> spp. (all)
81	<i>Corydoras</i> spp. (all)
82	<i>Corynopoma riisei</i>
83	<i>Crenuchus spilurus</i>
84	<i>Crossocheilus siamensis</i>
85	<i>Ctenobrycon spilurus</i>
86	<i>Ctenopoma</i> spp. (all)
87	<i>Cyathopharynx furcifer</i>

88	<i>Cynolebius</i> spp. (all)
89	<i>Cyphotilapia frontosa</i>
90	<i>Cyprinus carpio</i> - not from Asia
91	<i>Cyprochromis leptosoma</i>
92	<i>Cyrtocara moon</i>
93	<i>Danio</i> spp. (all)
94	<i>Dario</i> spp. (all)
95	<i>Datnoides microlepis</i>
96	<i>Datnoides pulcher</i>
97	<i>Dermogenys</i> spp. (all)
98	<i>Dicrosus</i> spp. (all)
99	<i>Dimidiochromis</i> spp. (all)
100	<i>Distichodus aftinis</i>
101	<i>Distichodus lussoso</i>
102	<i>Distichodus noboli</i>
103	<i>Distichodus sexfasciatus</i>
104	<i>Doryichthys martensii</i>
105	<i>Eigenmannia virescens</i>
106	<i>Eirmotus octozona</i>
107	<i>Epalzeorhynchus</i> spp. (all)
108	<i>Epiplatys</i> spp. (all)
109	<i>Erpetoichthys calabaricus</i>
110	<i>Esomus danricus</i>
111	<i>Etoplus</i> spp. (all)
112	<i>Gagata cenia</i>
113	<i>Gasteropelecus</i> spp. (all)
114	<i>Gastromyzon</i> spp. (all)
115	<i>Geophagus</i> spp. (all)
116	<i>Glossolepis</i> spp. (all)
117	<i>Gnathonemus</i> spp. (all)
118	<i>Gobiodes broussonnetii</i>
119	<i>Gymnanchus niloticus</i>
120	<i>Gymnochanda filamentosa</i>
121	<i>Gymnocorymbus ternetzi</i>
122	<i>Gymnogeophagus balzanii</i>
123	<i>Gyrinocheilus aymonieri</i>
124	<i>Haludania fasciata</i>
125	<i>Haplochromis</i> spp. (all)
126	<i>Hara jordani</i>
127	<i>Hasemania nana</i>
128	<i>Hassar notospilus</i>
129	<i>Helostoma temminki</i>
130	<i>Hemichromis bimaculatus</i>
131	<i>Hemichromis lifalli</i>
132	<i>Hemigrammopetersius caudalis</i>

133	Hemigrammus spp. (all)
134	Hemiodopsis spp. (all)
135	Hemirhamphodon pogonognathus
136	Herichthys carpinte
137	Herichthys cyanoguttatus
138	Herichthys dovii
139	Herichthys maculicauda
140	Heros appendiculatus
141	Heros severus
142	Hexanematichthys leptospis
143	Homaloptera spp. (all)
144	Hyphessobrycon spp. (all)
145	Hypselacara temporalis
146	Iguanodectes spilurus
147	Indostomus paradoxus
148	Inpaichthys kern
149	Iodotropheus sprengerae
150	Iratherina werneri
151	Jordanella floridae
152	Julidochromis spp. (all)
153	Kryptopterus spp. (all)
154	Labeo spp. (all)
155	Labeotropheus spp. (all)
156	Labidochromis caeruleus
157	Labiobarbus festivum
158	Ladigesia roloffii
159	Laetacara spp. (all)
160	Lamprichthys tanganicus
161	Lamprologus spp. (all)
162	Leiocassis siamensis
163	Lepidarchus adonis
164	Lepidocephalus guntea
165	Leporinus spp. (all)
166	Leptobarbus hoeveni
167	Leptobotia micronoemocheilus
168	Liosomadoras spp. (all)
169	Luciocephalus spp.
170	Luciosoma setigerum
171	Macrogathus spp. (all)
172	Macropodus spp. (all)
173	Marosatherina ladigesii
174	Mastacembelus spp. (all)
175	Megalamphodus spp. (all)
176	Melanochromis spp. (all)
177	Melanotaenia spp. (all)

178	<i>Mesonauta festivum</i>
179	<i>Mesonauta salvini</i>
180	<i>Mesonoemacheilus triangularis</i>
181	<i>Metriaclima</i> spp. (All)
182	<i>Microctenopoma</i> spp. (all)
183	<i>Microgeophagus</i> spp. (all)
184	<i>Microrasbora</i> spp. (all)
185	<i>Microsatherina ladigesii</i>
186	<i>Microsynodontis batesii</i>
187	<i>Mimagoniates barberi</i>
188	<i>Misgurnus fossilis</i>
189	<i>Moenkhausia</i> spp. (all)
190	<i>Mogurnda adspersa</i>
191	<i>Monocirrhus polyacanthus</i>
192	<i>Monodactylus argenteus</i>
193	<i>Monotretus travanconcus</i>
194	<i>Moringua raitaborua</i>
195	<i>Mormyrus kannume</i>
196	<i>Morulus chrysophekadion</i>
197	<i>Myleus rubripinnis</i>
198	<i>Mylossoma aureum</i>
199	<i>Mystus tengara</i>
200	<i>Mystus vittatus</i>
201	<i>Myxocyprinus asiaticus</i>
202	<i>Nandopsis managuense</i>
203	<i>Nandopsis salvini</i>
204	<i>Nannacara</i> spp. (all)
205	<i>Nannaethiops unitaeniatus</i>
206	<i>Nannobrycon</i> spp. (all)
207	<i>Nannochromis</i> spp. (all)
208	<i>Nannostomus</i> spp. (all)
209	<i>Nematobrycon</i> spp. (all)
210	<i>Neolamprologus</i> spp. (all)
211	<i>Neolebias</i> spp. (all)
212	<i>Neolissocheilus stracheti</i>
213	<i>Nimbochromis livingstonii</i>
214	<i>Nimbochromis venustus</i>
215	<i>Noemacheilus bhimachar</i>
216	<i>Noemacheilus corica</i>
217	<i>Nomorhamphus liemi</i>
218	<i>Nothobranchius</i> spp. (all)
219	<i>Notopterus</i> spp. (all)
220	<i>Ompok sabanus</i>
221	<i>Ophthalmotilapia</i> spp. (all)
222	<i>Oryzias</i> spp. (all)

223	<i>Osphronemus goramy</i>
224	<i>Osteoglossum bicirrhosum</i>
225	<i>Osteoglossum ferrerai</i>
226	<i>Otopharynx</i> spp. (all)
227	<i>Pangasius larnaudi</i>
228	<i>Pangasius polyuranodon</i>
229	<i>Pangasius sutchi</i>
230	<i>Pangio</i> spp. (all)
231	<i>Pantodon buchholtzi</i>
232	<i>Papiliochromis</i> spp. (all)
233	<i>Papyrocranus afer</i>
234	<i>Papyrocranus congoensis</i>
235	<i>Paracheirodon</i> spp. (all)
236	<i>Parachromis</i> spp. (all)
237	<i>Paracyprochromis nigripinnis</i>
238	<i>Parailla longifilis</i>
239	<i>Parambassis</i> spp (all)
240	<i>Pelteobagrus ornatus</i>
241	<i>Pelvicachromis</i> spp. (all)
242	<i>Petenia splendida</i>
243	<i>Petitella georgia</i>
244	<i>Petrocephalus</i> spp. (all)
245	<i>Phenacogrammus interruptus</i>
246	<i>Phenochilus tarzania</i>
247	<i>Pimelodas clarias</i>
248	<i>Pimelodas pictus</i>
249	<i>Pimelodella imitator</i>
250	<i>Pimelodus maculatus</i>
251	<i>Placidochromis</i> spp. (all)
252	<i>Platydoras costatus</i>
253	<i>Platyropius siamensis</i>
254	<i>Poecilia latipinna</i>
255	<i>Poecilia reticulata</i>
256	<i>Poecilia sphenops</i>
257	<i>Poecilia velifera</i>
258	<i>Poecilocharax weitzmani</i>
259	<i>Pollimyrus</i> spp. (all)
260	<i>Polypterus</i> spp. (all)
261	<i>Poppendetta conniae</i>
262	<i>Prionobrama f'iligera</i>
263	<i>Pristella maxilaris</i>
264	<i>Protomelas</i> spp. (all)
265	<i>Pseudocrenilabrus</i> spp. (all)
266	<i>Pseudogastromyzon</i> spp. (all)
267	<i>Pseudomugil furcatus</i>

268	<i>Pseudomugil gertrudae</i>
269	<i>Pseudopimelodus rainus rainus</i>
270	<i>Pseudotropheus</i> spp. (all)
271	<i>Pterophyllum</i> spp. (all)
272	<i>Pundamalia nyererei</i>
273	<i>Puntius</i> spp. (all)
274	<i>Pyrrhulina</i> spp. (all)
275	<i>Rachoviscus</i> spp. (all)
276	<i>Rasbora</i> spp. (all)
277	<i>Rasboroides vaterfifloris</i>
278	<i>Rita rita</i>
279	<i>Roeboides descavadensis</i>
280	<i>Satanoperca</i> spp. (all)
281	<i>Sawbwa resplendens</i>
282	<i>Scatophagus argus</i>
283	<i>Scatophagus tetracantha</i>
284	<i>Schistura</i> spp.
285	<i>Sciades pictus</i>
286	<i>Scianochromis</i> spp. (all)
287	<i>Selenotoca multifasciata</i>
288	<i>Semaprochilodus</i> spp. (all)
289	<i>Sewellia lineolata</i>
290	<i>Sillaganopsis panijus</i>
291	<i>Sillago domina</i>
292	<i>Silurichthys hasseltii</i>
293	<i>Simpsonichthys constanciae</i>
294	<i>Sinogastromyzon wui</i>
295	<i>Sphaerichthys</i> spp. (all)
296	<i>Stigmatogobius sadanundio</i>
297	<i>Sundanio</i> spp. (all)
298	<i>Symphysodon aquefasciatus</i>
299	<i>Symphysodon discus</i>
300	<i>Synodontis</i> spp. (all)
301	<i>Tanichthys albonubes</i>
302	<i>Tateurundina ocellicauda</i>
303	<i>Tatia perugia</i>
304	<i>Telmatherina ladigesii</i>
305	<i>Tetragonopterus argenteus</i>
306	<i>Tetraodon biocellatus</i>
307	<i>Tetraodon fahaka</i>
308	<i>Tetraodon fluviatilis</i>
309	<i>Tetraodon miurus</i>
310	<i>Tetraodon nigroviridis</i>
311	<i>Tetraodon Palembangensis</i>
312	<i>Thayeria</i> spp. (all)

313	<i>Theraps nicaraguense</i>
314	<i>Theraps synspilus</i>
315	<i>Thoracocharax stellatus</i>
316	<i>Thorichthys meeki</i>
317	<i>Thorichthys meeki</i> X <i>Amphylophus citrinellum</i> X <i>Theraps synspilus</i>
318	<i>Toxotes</i> spp. (all)
319	<i>Trichogaster</i> spp. (all)
320	<i>Trichopsis</i> spp. (all)
321	<i>Trigonostoma</i> spp. (all)
322	<i>Trinectes maculatus</i>
323	<i>Tropheus</i> spp. (all)
324	<i>Uaru amphiacanthoides</i>
325	<i>Vesicatrus tegatus</i>
326	<i>Vieja synspilus</i>
327	<i>Xenomystus nigri</i>
328	<i>Xiphophorus helleri</i>
329	<i>Xiphophorus maculatus</i>
330	<i>Xiphophorus variatus</i>
331	<i>Yasuhikotakia</i> spp. (all)

6-3-2020 MARINE FISHES

NO.	SPECIES
1	Acanthurus achilles
2	Acanthurus lineatus
3	Acanthurus nigrofuscus
4	Acanthurus olivaceus
5	Acanthurus pyroferus
6	Acanthurus triostegus
7	Aeoliscus strigatus (UWW only)
8	Amblyeleotris fasciata
9	Amblyeleotris guttata
10	Amblyeleotris steinitzi
11	Amphiprion chrysopterus
12	Amphiprion clarkii
13	Amphiprion melanopus
14	Amphiprion peredarion
15	Anamolops katopteron
16	Anampses meleagrides
17	Antenarius picta
18	Antennarius commersonii
19	Antennarius hispidus
20	Antennarius striatus
21	Apogon cyanosoma
22	Apolemichthys trimaculatus
23	Arothron hispidus
24	Arothron manilensis
25	Arothron mappa
26	Arothron meleagris
27	Arothron nigropunctatus
28	Balistoides conspicillum
29	Bothus mancus
30	Calloplelesioptis altivelis
31	Centropyge bicolor
32	Centropyge bispinosa
33	Centropyge colini
34	Centropyge flavicauda
35	Centropyge flavissima
36	Centropyge heraldi
37	Centropyge loricula
38	Centropyge multicolor
39	Centropyge nigriocella
40	Centropyge shepardi
41	Centropyge vrolickii
42	Cephalopholis miniatus

43	<i>Cephalopholis sexmaculata</i>
44	<i>Cephalopholis urodeta</i>
45	<i>Cetoscarus bicolor</i>
46	<i>Chaetodon auriga</i>
47	<i>Chaetodon benneti</i>
48	<i>Chaetodon ephippium</i>
49	<i>Chaetodon lunula</i>
50	<i>Chaetodon melannotus</i>
51	<i>Chaetodon meyeri</i>
52	<i>Chaetodon punctatofasciatus</i>
53	<i>Chaetodon reticulatus</i>
54	<i>Chaetodon rostratus</i>
55	<i>Chaetodon trifascialis</i>
56	<i>Chaetodon unimaculatus</i>
57	<i>Chaetodon vagabundus</i>
58	<i>Chelmon rostratus</i> UWW only
59	<i>Chrysiptera biocellata</i>
60	<i>Chrysiptera brownriggii</i>
61	<i>Chrysiptera caeruleolineata</i>
62	<i>Chrysiptera cyanea</i>
63	<i>Chrysiptera glauca</i>
64	<i>Chrysiptera traceyi</i>
65	<i>Cirrhitichthys falco</i>
66	<i>Cirrhitichthys oxycephalus</i>
67	<i>Cons aygula</i>
68	<i>Cons gaimard</i>
69	<i>Cromileptes altivelis</i>
70	<i>Cryptocentrus cyanotaenia</i>
71	<i>Ctenochaetus hawaiiensis</i>
72	<i>Ctenochaetus marginatus</i>
73	<i>Ctenochaetus strigosus</i>
74	<i>Diodon holocanthus</i>
75	<i>Diodon hystrix</i>
76	<i>Echenius naucrates</i>
77	<i>Echidna nebulosa</i>
78	<i>Ecsenius bicolor</i>
79	<i>Ecsenius midas</i>
80	<i>Epinephalis lanceolatus</i>
81	<i>Forcipiger flavissimus</i>
82	<i>Forcipiger longirostris</i>
83	<i>Genicanthus bellus</i>
84	<i>Genicanthus melanospilos</i>
85	<i>Genicanthus watanabei</i>
86	<i>Gnathanodon speciosus</i>
87	<i>Gobiodon atrangulatus</i>

88	<i>Gobiodon histrix</i>
89	<i>Gomphosus varius</i>
90	<i>Gorgasia preclara</i>
91	<i>Grammistes sexlineatus</i>
92	<i>Halaelurus buergeri</i> (UWW only)
93	<i>Halichoeres biocellatus</i>
94	<i>Halichoeres chrysus</i>
95	<i>Hemipteronotus taeniourus</i>
96	<i>Heniochus acuminatus</i>
97	<i>Heteroconger hassi</i>
98	<i>Hippocampus abdominalis</i> UWW only-captive bred only
99	<i>Hippocampus kuda</i> UWW only- captive bred only
100	<i>Histrio histrio</i>
101	<i>Hoplolatilus starcki</i>
102	<i>Labroides dimidiatus</i>
103	<i>Labropsis micronesica</i>
104	<i>Labropsis xanthonota</i>
105	<i>Lactoria cornuta</i>
106	<i>Lutjanus kasmira</i>
107	<i>Macolor macularis</i>
108	<i>Macropharyngodon meleagris</i>
109	<i>Malacanthus latovittatus</i>
110	<i>Meiacanthus atrodorsalis</i>
111	<i>Meiacanthus grammistes</i>
112	<i>Mirolabrichthys imeldae</i>
113	<i>Monocentrus japonicus</i>
114	<i>Muraena pardalis</i>
115	<i>Myrichthys colubrinus</i>
116	<i>Myrichthys maculosus</i>
117	<i>Nemateleotris decora</i>
118	<i>Nemateleotris magnifica</i>
119	<i>Neocirrhites armatus</i>
120	<i>Neoglyphidodon melas</i>
121	<i>Novaculichthys taeniourus</i>
122	<i>Ostracion cubicus</i>
123	<i>Ostracion meleagris</i>
124	<i>Oxycirrhites typus</i>
125	<i>Paracanthurus hepatus</i>
126	<i>Paracirrhites arcatus</i>
127	<i>Paracirrhites forsteri</i>
128	<i>Parapeneus barberinoides</i>
129	<i>Parapeneus cyclostomus</i>
130	<i>Photoblepharon palpebratus</i>
131	<i>Phyllopteryx taeniolatus</i> UWW only-captive bred only
132	<i>Platax orbicularis</i>

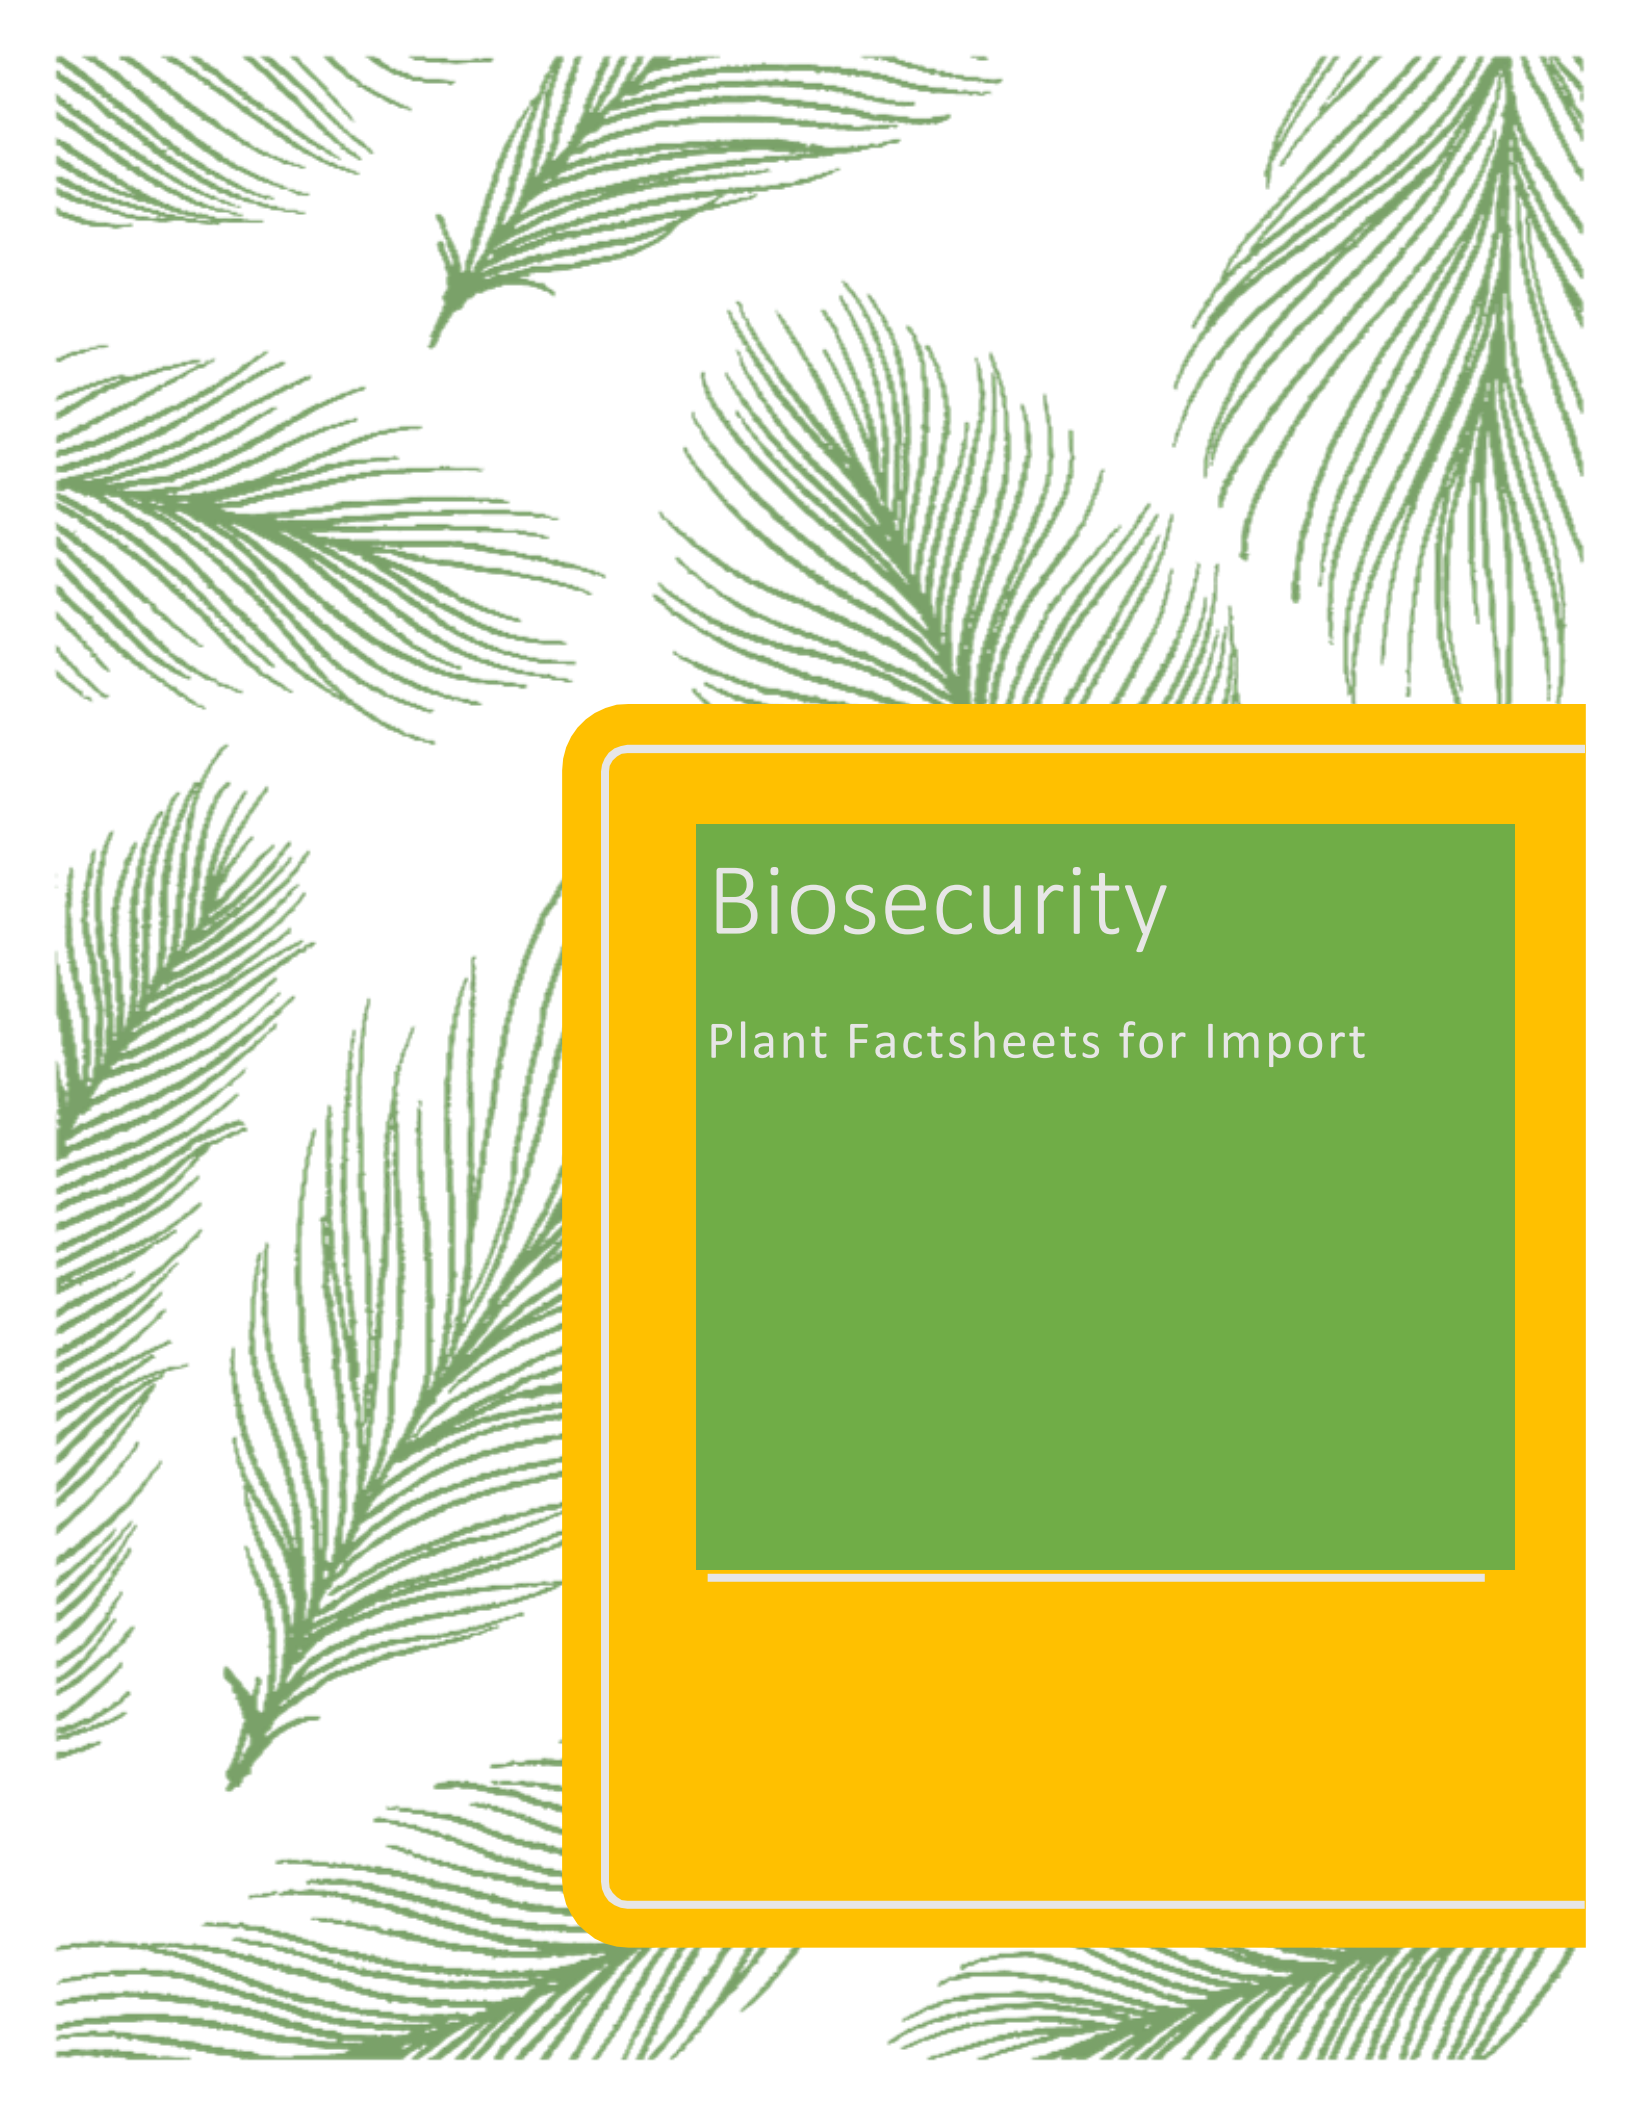

133	<i>Platax tiera</i>
134	<i>Plectorhinchus albovittatus</i>
135	<i>Plectorhinchus gibbosus</i>
136	<i>Plectorhinchus lessoni</i>
137	<i>Plectorhinchus lineatus</i>
138	<i>Plectorhinchus picus</i>
139	<i>Plectorhinchus unicolor</i>
140	<i>Plectorhinchus vittatus</i>
141	<i>Pogonoculius zebra</i>
142	<i>Pogonoperca punctata</i>
143	<i>Pomacanthus imperator</i>
144	<i>Pomacentrus amboinensis</i>
145	<i>Pomacentrus pavo</i>
146	<i>Pomacentrus vaiuli</i>
147	<i>Pseudanthias bicolor</i>
148	<i>Pseudanthias cooperi</i>
149	<i>Pseudanthias flavicauda</i>
150	<i>Pseudanthias hutomoi</i>
151	<i>Pseudanthias pascalus</i>
152	<i>Pseudanthias pleurotaenia</i>
153	<i>Pseudanthias ventralis</i>
154	<i>Pseudechidna brummeri</i>
155	<i>Pseudobalistes fusca</i>
156	<i>Pseudocheilinus hexataenia</i>
157	<i>Pterapogon kauderni</i> UWW only-captive bred only
158	<i>Ptereleotris coeruleus</i>
159	<i>Ptereleotris evides</i>
160	<i>Ptereleotris heteropterus</i>
161	<i>Ptereleotris zebra</i>
162	<i>Pterois radiata</i>
163	<i>Pterois volitans</i>
164	<i>Pygoplites diacanthus</i>
165	<i>Rhinecanthus aculeatus</i>
166	<i>Rhinomuraena quaesita</i>
167	<i>Rhinopias</i> spp. (UWW only)
168	<i>Salarias fasciatus</i>
169	<i>Salarias irroratus</i>
170	<i>Sargocentron spiniferum</i>
171	<i>Serranocirrhitus latus</i>
172	<i>Solenostomus paradoxus</i>
173	<i>Spilotichthys pictus</i>
174	<i>Thalassoma lunare</i>
175	<i>Thalassoma lutescens</i>
176	<i>Thysanophrys arenicola</i> (UWW only)
177	<i>Valenciennea puellaris</i>

178	<i>Valenciennea strigata</i>
179	<i>Xyrichthys pavo</i>
180	<i>Zebrasoma flavescens</i>
181	<i>Zebrasoma veliferum</i>

6-3-2020 PERMITTED AQUATIC PLANTS

NO.	SPECIES
1	Anubias spp.
2	Aponogeton spp.
3	Barclaya longifolia
4	Cryptocoryne spp.
5	Echinodorus spp. (except for E. cordifolius, E. osiris, and E.uruguayensis)
6	Helanthium tenellum
7	Hemianthus callitrichoides
8	Hemianthus micranthemoides
9	Hydrocatyle tripartita
10	Juncus repens
11	Marsilea angustifolia
12	Microsorium pteropus
13	Plagiomnium affine
14	Ranunculus inundatus

Plant Factsheets for Import

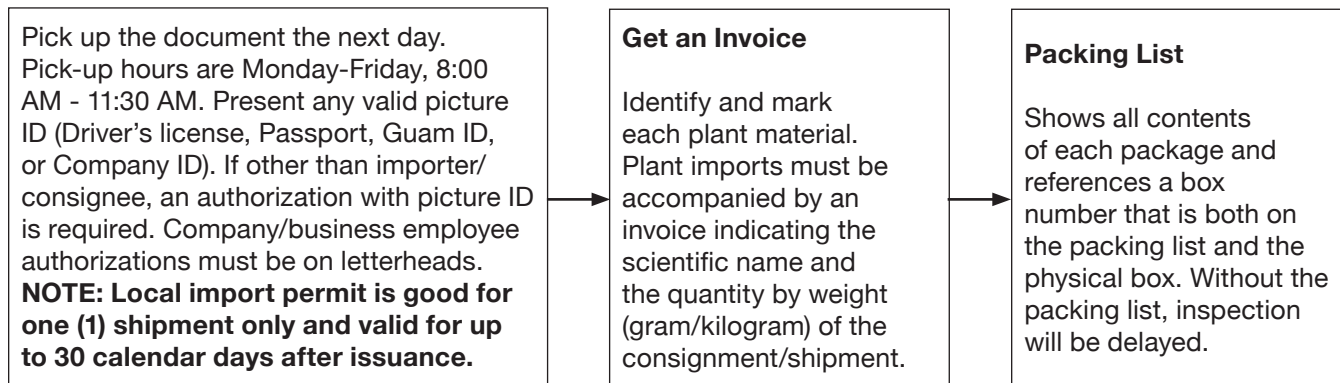

Domestic Import of Propagative Materials (Plants for Planting) to Guam

Christine Bucayu-Laurent¹, Russell K. Campbell², and James R. Hollyer¹

¹College of Natural & Applied Sciences, University of Guam; ²Biosecurity Division, Guam Department of Agriculture

This factsheet briefly summarizes the steps in obtaining an import permit for importation of Propagative Materials from the US mainland, Commonwealth of the Northern Mariana Islands (CNMI), and Hawai'i.

Packing Tips

Any restricted article at the time of importation or offer for importation to Guam shall not be packed in a packing material unless the plants were packed in the packing material immediately prior to shipment; such packing material must be free from sand, soil, or earth and has not been used previously as packing material. For the list of packing materials, visit <https://www.govregs.com/regulations/7/319.37-9>.

What is the intended means of importing the Propagative Material?
Note: Propagative Materials are not allowed to be handcarried on a plane trip.

U.S. Postal Service (USPS) or courier (DHL, FedEx, UPS, etc.)

1. All packages get sent to USDA-APHIS Plant Inspection Station where plants are inspected first - not at home, or a business address. Mail to: Guam Department of Agriculture, Biosecurity Division, 17-3306 Neptune Ave., Barrigada, GU 96913.
2. On a separate paper within the package, write name, address, and phone number of the intended recipient.
3. On the outer package, place a sheet of paper with the following information: general nature and quantity of the contents; country and locality where grown, name and address of shipper, owner, or person shipping or forwarding the plants for planting, and number of the written permit authorizing the importation if one was required.

Note: By law, a customer is liable when a seed package is directly delivered (usually via USPS Priority Mail) to the mailing address bypassing USDA-APHIS inspection. When this happens, bring the received package to the Plant Inspection Facility for inspection.

Sea/Air Cargo

1. Packages must be routed, unopened, to the Plant Inspection Station, 17-3306 Neptune Ave., Barrigada, GU 96913.
2. Write the following information on a sheet of paper and attach to the package or attach to the plant (if not placed in a box): general nature and quantity of the contents; country and locality where grown, name and address of shipper, owner, or person shipping or forwarding the plants for planting, name and address of consignee, shipper's mark and number, and number of written permit authorizing the importation, if one was required.
3. A packing list must accompany each package of material. For shipments with more than one (1) package, a copy of the invoice must be enclosed within Package No. 1, which means that all packages must have consecutive numbers.

Based on the payment receipt, take note of the expected delivery date. Notify the Plant Inspection Station of the shipment's arrival preferably 24 hrs. in advance. Notice should be given at least by Friday afternoon if the package(s) will come in on a Sunday or a Monday holiday. The importer must provide personnel for offloading purposes. See page 46 for more details (<https://tinyurl.com/kg8n5v8>).

Domestic Import of Fruits and Vegetables to Guam

Christine Bucayu-Laurent¹, Russell K. Campbell², and James R. Hollyer¹

¹College of Natural & Applied Sciences, University of Guam; ²Biosecurity Division, Guam Department of Agriculture

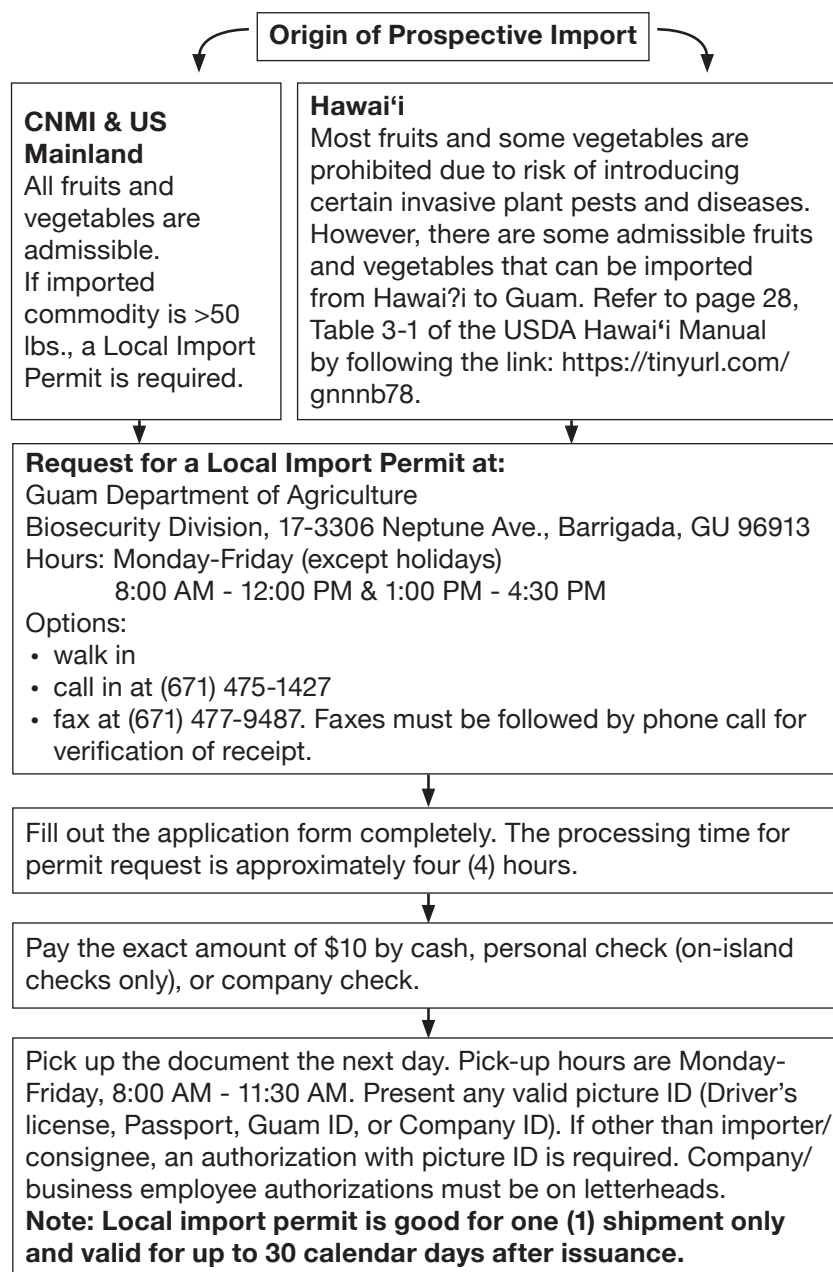

This factsheet briefly summarizes the steps in obtaining an import permit for importation of fruits and vegetables from the US mainland, Commonwealth of the Northern Mariana Islands (CNMI), and Hawai'i. It is very important to note that the importation of fruits and vegetables requires different treatments depending on the commodity. All treatments should be undertaken in the place of origin before importing and all fruits and vegetables must be free from pests, soil, and plant litter or debris.

List all commodities to be imported:

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Foreign Import of Propagative Materials (Plants for Planting) to Guam

Christine Bucayu-Laurent¹, Russell K. Campbell², and James R. Hollyer¹

¹College of Natural & Applied Sciences, University of Guam; ²Biosecurity Division, Guam Department of Agriculture

Many plants from foreign countries may enter Guam provided they meet the entry requirements, which may vary by plant and country of origin. Nearly all plants for planting **MUST** meet USDA Animal and Plant Health Inspection Service (APHIS) and Guam Department of Agriculture rules and general restrictions to be considered for import into Guam. Some plants for planting have specific restrictions and must meet **BOTH** general restrictions and specific restrictions for importation. Otherwise, the plants will be refused entry and will be sent back to its country of origin. These restrictions are imposed to prevent the introduction of pests and diseases into the United States, including Guam.

This factsheet shows the general steps on how to import propagative plant materials to Guam including links to the US Department of Agriculture's website. Propagative plant materials include live plants, bulbs, corms, cuttings, root crowns, and seeds. It is highly recommended that an Import permit and other documents be obtained at least 30 days before the shipment's arrival to Guam. Besides Import Permit, Phytosanitary Certificate, and Invoice, there might be additional permits or documents required based on the plant to be imported. Look at the general restrictions. If these restrictions are not met at any point in the inspection process, the plant material may be delayed entry or not authorized entry to Guam by inspectors (Agriculture Biosecurity Officers or Guam Customs Officers). If a Controlled Import Permit (CIP) has been previously acquired for plants for planting, then the general restrictions **DO NOT** apply. All plants should be free from pests and diseases.

Verification of List

Verify if the commodity is admissible by looking at the List of Plants for Planting Manual, Chapter 6, page 277 (<https://tinyurl.com/kg8n5v8>).

Growing media

Plants for planting must be free from sand, soil, other growing media, pests, and diseases.

Size and Age

Plants for planting must meet size and age requirements. Size and age restrictions are based on whether the whole plant or part of a plant is admissible for import, see page 31 (<https://tinyurl.com/kg8n5v8>).

List all commodities to be imported:

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Obtain an APHIS Import Permit

It is recommended for customers to use the ePermit system, rather than filing the forms manually and submitting it by mail, for faster processing. First, create an eAuthentication account and register for a Level 2 access. It takes about 30 minutes to finish the process. Once registered, you can now use the ePermit system by logging into the eAuthentication database (<https://tinyurl.com/jd9zwnt>). Apply for **PPQ Form 587** at least 30 days prior to arrival on Guam, unless meeting the exemption conditions, see page 37-38 (<https://tinyurl.com/kg8n5v8>). **Note: Other permits may be required, see page 69 for Special Permits** (<https://tinyurl.com/kg8n5v8>).

Request for a Local Import Permit at:

Guam Department of Agriculture
Biosecurity Division, 17-3306 Neptune Ave., Barrigada,
GU 96913

Hours: Monday-Friday (except holidays)

8:00 AM - 12:00 PM & 1:00 PM - 4:30 PM

Options:

- walk in
- call in at (671) 475-1427
- fax at (671) 477-9487. Faxes must be followed by phone call for verification of receipt.

Fill out the application form completely. The processing time for permit request is approximately four (4) hours.

Pay the exact amount of \$10 by cash, personal check (on-island checks only), or company check.

Pick up the document the next day. Pick-up hours are Monday-Friday, 8:00 AM - 11:30 AM. Present any valid picture ID (Driver's license, Passport, Guam ID, or Company ID). If other than importer/consignee, an authorization with picture ID is required. Company/business employee authorizations must be on letterheads.

NOTE: Local import permit is good for one (1) shipment only and valid for up to 30 calendar days after issuance.

Phytosanitary Certificate and CITES Certificate (if applicable)

Shipment must be accompanied by a Phytosanitary Certificate issued by the country from which it was grown. It must be an original or certified true copy issued no more than 15 days prior to shipment. If importing orchids, cacti, and other protected plants, obtain a CITES Certificate from the country of origin.

Note: See list of exemptions on page 40 (<https://tinyurl.com/kg8n5v8>).

Get an Invoice

Identify and mark each plant material. Plant imports must be accompanied by an invoice indicating the scientific name and the quantity by weight (gram/kilogram) of the consignment/shipment.

Packing List

Shows all contents of each package and references a box number that is both on the packing list and the physical box. Without the packing list, inspection will be delayed.

Packing Tips

Any restricted article at the time of importation or offer for importation to Guam shall not be packed in a packing material unless the plants were packed in the packing material immediately prior to shipment; such packing material must be free from sand, soil, or earth and has not been used previously as packing material. For the list of packing materials, visit <https://www.govregs.com/regulations/7/319.37-9>.

For further inquiries about admissibility and entry requirements of certain plants, call/email:

Permit Services

4700 River Road, Riverdale, MD 20737

Phone: (301) 851-2046 or toll-free at (877) 770-5990

Email: permits@aphis.usda.gov

Hours: Monday-Friday, 8:00 AM - 5:00 PM EST (except holidays)

Or visit:

USDA, Plant Inspection Station

17-3306 Neptune Avenue, Barrigada, GU 96913

Phone: (671) 475-0854/475-1427

Fax: (671) 475-0853

Hours: Monday-Friday (except holidays)

8:00 AM - 12:00 PM & 1:00 PM - 4:30 PM

If the commodity is listed as Not Authorized Pending Pest Risk Analysis (NAPPRA), there are two options on how to import it.

Research

The commodity can be imported for experimental research, breeding, or development of new varieties and therapeutic treatment to provide pest-free stock. Obtain PPQ 558 (Controlled Import Permit) but this permit only allows limited quantity under specified conditions that includes testing, containment, or other specified conditions both before and after import.

Commercial Distribution

Generally, the commodity cannot be imported for commercial distribution. However, if you still want to import, request and complete a Pest Risk Analysis (PRA) for that plant from the National Plant Protection Organization (<https://tinyurl.com/kypgbfn>).

What is the intended means of importing the Propagative Material?
Note: Propagative Materials are not allowed to be handcarried on a plane trip.

U.S. Postal Service (USPS) or courier (DHL, FedEx, UPS, etc.)

1. All packages get sent to USDA-APHIS Plant Inspection Station where plants are inspected first - not at home, or a business address. Mail to: Guam Department of Agriculture, Biosecurity Division, 17-3306 Neptune Ave., Barrigada, GU 96913.
2. On a separate paper within the package, write name, address, and phone number of the intended recipient.
3. On the outer package, place a sheet of paper with the following information: general nature and quantity of the contents; country and locality where grown, name and address of shipper, owner, or person shipping or forwarding the plants for planting, and number of the written permit authorizing the importation if one was required.

Note: By law, a customer is liable when a seed package is directly delivered (usually via USPS Priority Mail) to the mailing address bypassing USDA-APHIS inspection. When this happens, bring the received package to the Plant Inspection Facility for inspection.

Sea/Air Cargo

1. Packages must be routed, unopened, to the Plant Inspection Station, 17-3306 Neptune Ave., Barrigada, GU 96913.
2. Write the following information on a sheet of paper and attach to the package or attach to the plant (if not placed in a box): general nature and quantity of the contents; country and locality where grown, name and address of shipper, owner, or person shipping or forwarding the plants for planting, name and address of consignee, shipper's mark and number, and number of written permit authorizing the importation, if one was required.
3. A packing list must accompany each package of material. For shipments with more than one (1) package, a copy of the invoice must be enclosed within Package No. 1, which means that all packages must have consecutive numbers.

Based on the payment receipt, take note of the expected delivery date. Notify the Plant Inspection Station of the shipment's arrival preferably 24 hrs. in advance. Notice should be given at least by Friday afternoon if the package(s) will come in on a Sunday or a Monday holiday. The importer must provide personnel for offloading purposes. See page 46 for more details (<https://tinyurl.com/kg8n5v8>).

Foreign Import of Fruits and Vegetables to Guam

Christine Bucayu-Laurent¹, Russell K. Campbell², and James R. Hollyer¹

¹College of Natural & Applied Sciences, University of Guam; ²Biosecurity Division, Guam Department of Agriculture

This factsheet briefly summarizes the steps in obtaining an import permit for importation of fruits and vegetables from foreign countries. Importing fresh fruits, vegetables, and herbs must be intended for consumption and NOT for planting or growing. Only the approved plant part(s) of the fresh fruit, vegetable, and herb is allowed entry to Guam. It usually takes up to 30 days for a permit to be processed so it is recommended to apply for a permit at least a month before the desired import date. It is not necessary to apply for a permit every import of fruits or vegetables provided that all import requirements are met and the permit is unexpired.

On Guam, USDA Animal and Plant Health Inspection Service (APHIS) offers both manual and online processing of permits (ePermit system). Customers are encouraged to take advantage of the ePermits system, which is an electronic tool that issues permit, certificates, and other regulation-based verification. To use the system, a customer is required to sign up for an eAuthentication account as shown on the flowchart. Registered users can submit permit applications online, receive notifications of expirations, and can access options for renewal. The ePermits system helps expedite the entire process and enables users to track the status of applications.

List all commodities to be imported:

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Verify if the commodity is admissible by looking at the Fruits and Vegetables Import Requirements (FAVIR) online database (<https://tinyurl.com/5jmonw>).

At the top of the screen, search for the fruit or vegetable by country or name.

Is the fruit or vegetable on the admissible list?

NO

Using the FAVIR User Guide, refer to Table 1 on page 2 for list of broader categories (<https://tinyurl.com/h6pkkym>).

The commodity may not be authorized entry to Guam.

You may call 1-301-851-2046 or 1-877-770-5990, or send an email inquiry to PPQ.FAVIR.Comments@aphis.usda.gov to see if there is a way to bring the desired commodity to Guam.

YES

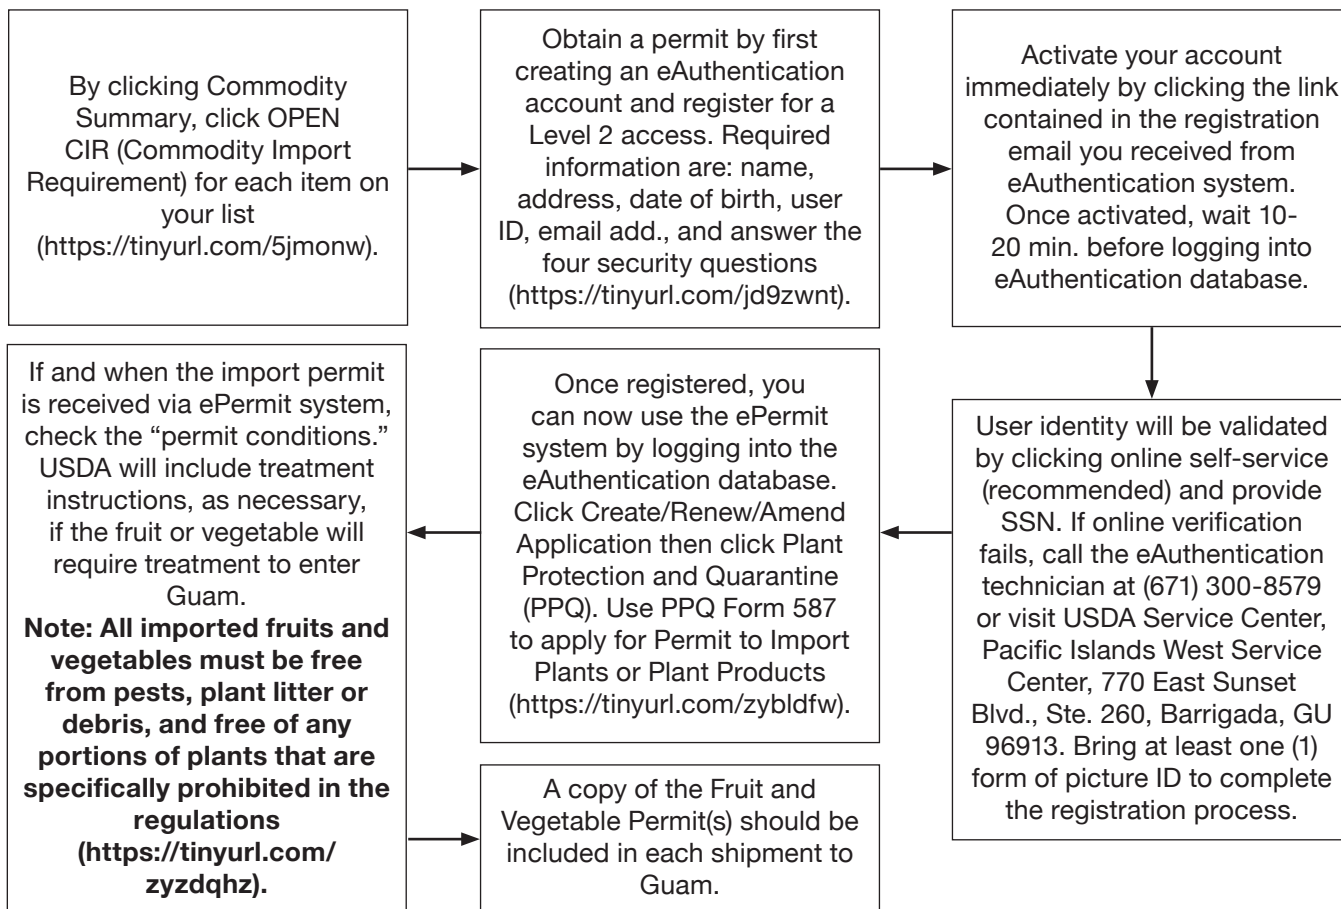

See back page for further steps.

Is the commodity on the admissible list?

NO

YES

Steps on How To Obtain a Federal Import Permit

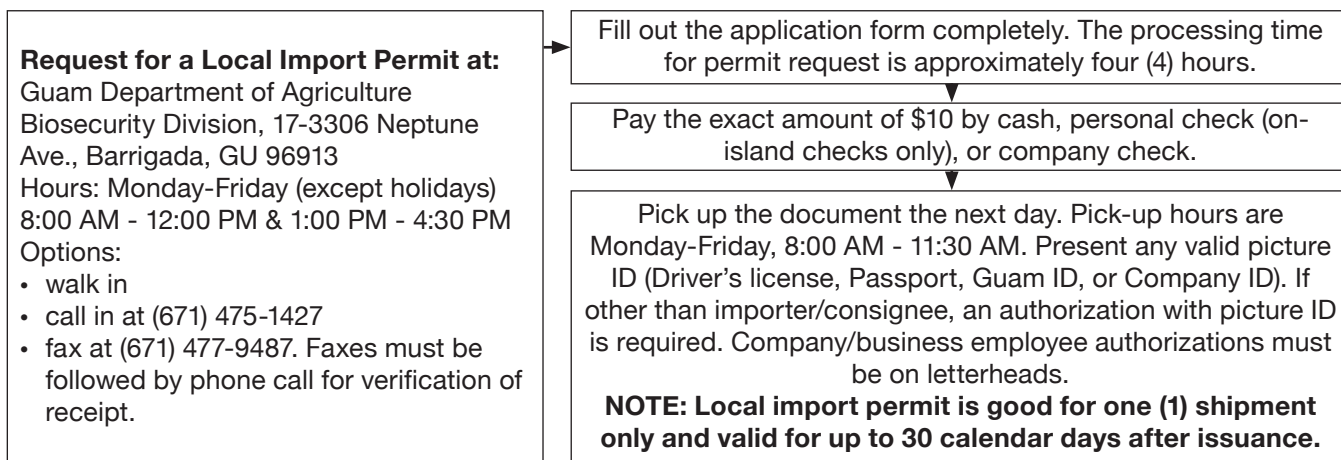

For further inquiries about the application process for a federal Fruit and Vegetable Import Permit, call/email:

USDA APHIS, Plant Protection and Quarantine, MD 20737

Phone: (301) 851-2346 **Email:** PPQ.Favir.Comments@aphis.usda.gov

Hours: Monday-Friday (except holidays) 8:00 AM - 5:00 PM ET

Aside from the federal import permit, a local import permit is also required for each shipment to Guam.
